Digital Signage at Canadian Airports

Publication of record for the Sign Association of Canada

NEWS

Send your news to Peter Saunders, Editor, psaunders@signmedia.ca**Toronto VW dealership shifts into fast lane with digital signage**

Advanced, a digital signage integrator headquartered in Mississauga, Ont., has installed a large, central video wall and nine individual screens at the Humberview Volkswagen (VW) dealership in nearby Toronto.

The nearly 8.2 x 1.2 -m (27 x 4-ft) video wall is mounted above the dealership's customer welcoming area. It comprises 16 ultra-thin-bezel 1.2-m (46-in.) high-definition (HD) liquid crystal displays (LCDs), arranged in a 2 x 8 configuration that can showcase a single image or up to four ads side-by-side.

Each of the nine smaller screens throughout the building has a dedicated video feed delivered through the same matrix switcher, allowing managers to decide what images they want to appear on which display(s) throughout the day.

**Electronic resources**

- **Roland DGA** has introduced new interactive project-based learning (PBL) tutorials (www.rolanddga.com/support/roland-academy/pbl), designed specifically for use with its wide-format inkjet printers and vinyl cutters, to give students in schools, colleges and other educational facilities a better understanding of the technology. The tutorials (example pictured) include step-by-step instructions for everything from cutting decals to customizing smartphone covers.
- Computer numerical control (CNC) router manufacturer **Axyz International**, based in Burlington, Ont., published its third **Apple iBook** (www.axyz.com/us/iBook), featuring information about its Trident product line in an interactive format.
- **Gemini** updated the website for its Duets-branded engravable architectural sign substrates (www.duetsbygemini.com) with online ordering for Canada and around the world, simpler navigation and improved functionality.
- Engraving and cutting system developer **Gravotech** redesigned the website for its Type3 computer-aided design/manufacturing (CAD/CAM) software (www.type3.com) with an updated appearance and more responsive format.
- **Nimlok**, a division of **Orbus Exhibit & Display Group**, released an e-book (www.nimlok.com/learn-to-exhibit-better) to help guide the planning and preparation of trade show exhibits.

Facilities

- Piezoelectric drop-on-demand (DoD) inkjet printhead manufacturer **Xaar** has opened a new centre dedicated to three-dimensional (3-D) printing technology at England's Nottingham Science Park (pictured are CEO Doug Edwards, left, and 3-D printing business director Neil Hopkinson, right).
- Out-of-home (OOH) advertising firm **Poster the City** expanded with a new office in St. John's, N.L.
- Self-adhesive film manufacturer **Ritrama** plans to open a new 32,516 m² (350,000-sf) production centre in Moore, S.C., by the fourth quarter of 2017, which will serve as its North American headquarters (HQ).
- **Ok! Data Americas**, known for its ColorPainter wide-format printers, opened a new technology solutions centre in Irving, Texas.
- Digital signage hardware and service provider **Delphi Display Systems** is relocating its corporate headquarters (HQ) within Costa Mesa, Calif., to the new Harbor Gateway Business Center, with expanded space for research and development (R&D).
- Ink and coating supplier **Inx International** expanded its facility in Charlotte, N.C., with 2,137 m² (23,000 sf) of additional space for warehousing, manufacturing, docking, engineering, maintenance and offices, for a total of 6,039 m² (65,000 sf).
